Clinical Neuroscience Partnership

NPsych **Clinical Neurosciences Partnership**

Thank you for your enquiry.

NPsych is a partnership between Dr Nigel Walton, Dr Renée McCarter and Dr Martin Bunnage. All are clinical neuropsychologists skilled and experienced in the neuropsychological assessment of brain dysfunction and its effect on behaviour and cognition and in the differentiation of organic and functional deficits. All hold honorary University of Bristol appointments and are engaged in teaching neuropsychology at graduate and post-graduate level.

Our practice is managed by Mrs Catherine Mair BSc, MSc., who has extensive experience in the field. She is assisted by Ms Julie Vowles.

The partnership provides reports to the legal and medical professions as well as to the CICA and insurers.

We provide reports of the highest calibre, reflecting our commitment to excellence in scientific practice. Our reports are based on thorough, reliable and valid assessment procedures and our opinions are based on sound scientific decision-making principles. As a result our opinions are extremely resistant to challenge. Our aim is to provide opinions upon which instructing parties can robustly depend.

We regularly review our practices via peer review within and without the partnership and are always keen to discuss matters with instructing parties so as to ensure that our work remains as highly valued as it is currently.

We believe that our fee structure is fair and reflects a number of factors:

- Our commitment to excellence and our standing within the profession.
- Our overheads in providing quality assessment settings in Bristol and London.
- Provision of a high quality administration.
- Our commitment to work with instructing parties to ensure that deadlines are met.
- The fees charged by our peers.

Further information (biographies and CVs) is available on the NPsych website: www.npsych.co.uk

A detailed breakdown of our fee structure and terms can be found overleaf.
